	Total			<b>21</b>	<b>900</b>	<b>15</b>	<b>12</b>
Total contact hrs= 27 hrs/week							

- Student **contact hrs./ week =27**
- Theory and practical periods of 60 minutes each
- Abbreviation: L: Lecture class; P: Practical class
- **For Theoretical subjects:** Internal Assessment (40 Marks): Mid semester class test: 20 Marks; Quizzes, viva-voce, Assignment: 10 Marks; Attendance: 10; External Assessment: 60 Marks.
- **For Practical/ Sessional Subjects:** Internal Assessment-60 Marks [Continuous Evaluation:50; Class Attendance:10]; End Semester Assessment-40 Marks [Assignment on the day of Viva-voce and Practical Report submission:20; Viva-voce:20]
- To make the students more familiar with software, effort should be made to prepare laboratory report (like graph; data table etc.) in soft format in addition with traditional hard copy wherever possible.

Course Code	:	EEPC302
Course Title	:	<b>ENERGY CONSERVATION AND AUDIT</b>
Semester	:	6
Number of Credits	:	3 (L:3,T:0,P:0)
Prerequisites	:	NIL
Course Category	:	PC

## Course Objective

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

1. Know energy conservation in various electrical machines and electrical installation systems.
2. Know Energy conservation through Cogeneration and Tariff.
3. Know energy audit of electrical systems.

<b>Contents (Theory):</b>		<b>Hrs./Unit</b>
<b>Unit : 1</b>	<p><b>Energy Conservation Basics:</b></p> <p>1.1 Energy Scenario: Primary and Secondary Energy, Energy demand and supply, National scenario.</p> <p>1.2 Energy conservation and Energy audit – concept, need and difference.</p> <p>1.3 Indian Electricity Act 2003; relevant clauses of energy conservation</p> <p>1.4 BEE and its Roles in energy conservation</p> <p>1.5 Star Labelling: Concept, Need and its benefits.</p>	<b>04</b>
<b>Unit : 2</b>	<p><b>Energy Conservation in Electrical Machines:</b></p> <p>2.1 Need for energy conservation in induction motor and transformer.</p> <p>2.2 Energy conservation techniques in induction motor by –</p> <p>i) Improving Power quality.</p> <p>ii) Motor survey</p> <p>iii) Matching motor with loading.</p> <p>iv) Minimizing the idle and redundant running of motor.</p> <p>v) Operating in star mode lower output power.</p> <p>vi) Rewinding of motor.</p> <p>vii) Replacement by energy efficient motor</p> <p>viii) Periodic maintenance</p> <p>2.3 Energy conservation techniques in Transformer by –</p> <p>i) Load sharing</p> <p>ii) Parallel operation</p> <p>iii) Isolating techniques.</p> <p>iv) Replacement by energy efficient transformers.</p> <p>v) Periodic maintenance.</p> <p>2.4 Energy Conservation Equipment:</p> <p>i) Soft starter</p> <p>ii) Automatic star delta converter</p>	<b>11</b>

	<ul style="list-style-type: none"> <li>iii) Variable Frequency Drives</li> <li>iv) Automatic p. f. controller (APFC)</li> <li>v) Intelligent p. f. controller (IPFC)</li> </ul> <p>2.5 Energy efficient motor – features, advantages, applications and limitations.</p> <p>2.6 Energy efficient transformers, amorphous transformers, epoxy Resin cast transformer / Dry type of transformer.</p>	
<b>Unit: 3</b>	<p><b>Energy conservation in Electrical Installation systems:</b></p> <p>3.1 Aggregated Technical and commercial losses (AT&amp;C) – Power system at state, regional, national and global level.</p> <p>3.2 Causes of Technical losses and measures to reduce it –</p> <ul style="list-style-type: none"> <li>i) Controlling I<sup>2</sup>R losses</li> <li>ii) Optimizing distribution voltage</li> <li>iii) Balancing phase currents</li> <li>iv) Compensating reactive power flow</li> <li>v) Demand side management</li> </ul> <p>3.3 Causes of Commercial losses and measures to reduce it –</p> <ul style="list-style-type: none"> <li>i) In meter reading</li> <li>ii) In metering</li> <li>iii) Theft of electricity by any means</li> </ul> <p>3.4 Energy conservation equipment: Maximum Demand Controller, KVAR Controller, Automatic Power Factor controller (APFC); Active harmonic filter.</p> <p>3.5 Energy Conservation in Lighting System –</p> <ul style="list-style-type: none"> <li>i) Replacing Lamp sources.</li> <li>ii) Using energy efficient luminaries.</li> <li>iii) Using light controlled gears.</li> <li>iv) Installation of separate transformer / servo stabilizer for lighting.</li> <li>v) Periodic survey and adequate maintenance programs.</li> </ul> <p>3.6 Energy Conservation techniques in fans, Electronic regulators.</p> <p>3.7 Techniques of Energy Saving in Ventilating systems and Air Conditioners</p> <p>3.8 Techniques of Energy Saving in Furnace, Ovens and Boiler.</p>	<b>12</b>
<b>Unit: 4</b>	<p><b>Energy conservation through Cogeneration and Tariff:</b></p> <p>4.1 Co-generation and Tariff – concept, significance for energy conservation</p> <p>4.2 Co-generation – Types of cogeneration on basis of sequence of energy use (Topping cycle, Bottoming cycle)</p> <ul style="list-style-type: none"> <li>4.2.1 Types of cogeneration basis of technology (Steam turbine cogeneration, Gas turbine cogeneration, Reciprocating engine cogeneration).</li> <li>4.2.2 Factors governing the selection of cogeneration system.</li> <li>4.2.3 Advantages of cogeneration.</li> </ul> <p>4.3 Tariff: Types of tariff structure: Special tariffs; Time-off-day tariff, Peak-off-day tariff, Power factor tariff, Maximum Demand tariff, Load factor tariff.</p> <p>Application of tariff system to reduce energy bill.</p> <p>4.4 Energy conservation by improving load factor and power factor.</p>	<b>09</b>
<b>Unit: 5</b>	<p><b>Energy Audit of Electrical System:</b></p> <p>5.1 Energy audit (definition as per Energy Conservation Act).</p> <p>5.2 ABC analysis – its need and application.</p>	<b>09</b>

5.3 Energy audit instruments and their use. 5.4 Questionnaire for energy audit projects. 5.5 Energy flow diagram (Sankey diagram) and its importance. 5.6 Calculation of simple payback period for energy conservation equipment. Energy Audit procedure (walk through audit and detailed audit). 5.7 Energy Audit report format. 5.8 Numericals on energy audit.	
<b>Total</b>	<b>45</b>

### Course Outcomes:

The theory and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- a) Interpret energy conservation policies in India.
- b) Know energy conservation techniques in electrical machines & implement it.
- c) Know different types of measuring instruments for measuring electric power.
- d) Apply energy conservation techniques in electrical installations.
- e) Use Co-generation and relevant tariff for reducing losses in facilities.
- f) Know energy audit for electrical system and apply it for real cases.

<b>Internal Assessment (40 Marks)</b>		
Mid Semester Class Test:20 Marks	Quizzes, viva-voce, Assignment: 10 Marks	Attendance: 10
<b>External Assessment (End Semester Examination:60 Marks)</b>		
GROUP	UNIT	
A	1,2	
B	3	
C	4,5	

Course Code	:	EEPC304
Course Title	:	<b>ENERGY CONSERVATION AND AUDIT LABORATORY</b>
Number of Credits	:	1 (L:0,T:0,P:2)
Prerequisites	:	NIL
Course Category	:	PC

### Course Objective

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences –

1. Apply energy conservation in various electrical machines and electrical installation systems.
2. Apply Energy conservation through Cogeneration and Tariff.
3. Apply energy audit in electrical systems.

### List of Practicals: (At least EIGHT are to be performed)

1. Experiment to compare power consumption of different types of TL with electromagnetic ballast, electronic ballast and LED lamps by direct measurements and estimate energy saving.
2. Experiment to determine the reduction in power consumption in star mode operation of Induction motor compared to delta mode at different load conditions.
3. Experiment to estimate energy saving by improving power factor using PFC/APFC for an electrical load.
4. Experiment to estimate energy saving by improving load factor for an establishment.
5. Perform experiment to determine the reduction in power consumption by replacement of Fans and regulators in a class room / laboratory.
6. Collect electricity bill of a residential consumer and suggest suitable means for energy conservation and reduce consumption.
7. Prepare an energy audit report (Phase-I, Phase-II, Phase-III) for a Workshop/ Institute.
8. Identify star labeled electrical apparatus and compare the data for various star ratings.
9. Collect electricity bill of a commercial consumer and suggest suitable tariff for energy conservation and reduction of its energy bill.
10. Collect electricity bill of an industrial consumer and suggest suitable tariff for energy conservation and its impact on energy bill.
11. Prepare a sample energy audit questionnaire for the given industrial/Commercial facility.
12. Energy flow diagram (Sankey diagram) through EMS software Web Link : <a href="http://demo.ecostruxure-power-monitoring-expert.se.app/Web">demo.ecostruxure-power-monitoring-expert.se.app/Web</a> ;User ID : demo; Password : demo

### Course Outcomes

The theory, practical and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- a) Interpret energy conservation policies in India.
- b) Implement energy conservation techniques in electrical machines.
- c) Apply energy conservation techniques in electrical installations.

- d) Use Co-generation and relevant tariff for reducing losses in facilities.  
 e) Apply energy audit for electrical system.

## E X A M I N A T I O N S C H E M E (SESSIONAL)

1. **Continuous Internal Assessment of 60 marks** is to be carried out by the teachers throughout the fourth Semester.  
**Distribution of marks:** Continuous evaluation:50 Marks; Class Attendance: 10 Marks
2. **External Assessment (end Semester examination) of 40 marks** shall be held at the end of the sixth Semester on the entire syllabus. Assignment on the day of Viva-voce and practical report submission:20; Viva-voce:20

Course Code	:	EEPE 302/1
Course Title	:	INDUSTRIAL INSTRUMENTATION AND CONDITION MONITORING
Number of Credits	:	3 (L: 3, T: 0, P: 0)
Prerequisites	:	NIL
Course Category	:	PE

### Course Objective

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences –

- Knowledge about different transduces.
- Know about of signal conditioning.
- Know about condition monitoring.

<b>Contents (Theory):</b>		<b>Hrs./Unit</b>
<b>Unit : 1</b>	<b>Fundamentals of instrumentation</b> 1.1 Basic purpose of instrumentation. 1.2 Basic block diagram (transduction, signal conditioning, signal presentation) and their functions. 1.3 Construction, working and application of switching devices- Push button, limit switch, float switch, pressure switch, thermostat, electromagnetic relay.	<b>4</b>
<b>Unit : 2</b>	<b>Transducers</b> 2.1 Concept of Transducers. 2.2 Distinguish between Transducers: 2.2.1 Primary and Secondary Transducers. 2.2.2 Electrical and Mechanical Transducers. 2.2.3 Analog and Digital Transducers. 2.2.4 Active and passive Transducers. 2.3 Advantages of electric transducers. 2.4 Required characteristics of transducers. 2.5 Factors affecting the choice of transducers. 2.6 Construction, working principle and application (with diagram & explanation) of following transducers: 2.6.1 RTD, Thermistor, Thermocouple. 2.6.2 Potentiometer (various types) 2.6.3 Strain gauge (No derivation only formula) Types of strain gauges like unbonded, bonded and semiconductor 2.6.4 LVDT and RVDT, measurement for displacement, Piezoelectric transducer. 2.6.5 Contact and non-contact type tachometer for speed measurement.	<b>10</b>

	2.6.6 Construction and Working of Flow measurement by electromagnetic and Turbine Flow meter.	
<b>Unit: 3</b>	<b>Operational Amplifier</b> 3.1 Different Parameters of op-amp: Input offset voltage, Input offset current, Input bias current, Differential input resistance, CMRR, SVRR, voltage gain, output voltage, slew rate, gain band- width. Output, short circuit current. 3.2 Use of op-amp (IC-741) as adder, subtractor, integrator, differentiator, comparator. 3.3 Instrumentation Amplifier.	<b>6</b>
<b>Unit: 4</b>	<b>Signal conditioning:</b> 2.1 Basic Concept of signal conditioning System. 2.2 Block diagram of AC and DC signal conditioning and working. 2.3. V to I converter, I to V converter, V to F converter. 2.4 Filters - Types and frequency response (No derivation) and circuits. 2.5 Multiplexing – Fundamentals, different types. 2.6 Sample and hold circuits - operation and its application	<b>8</b>
<b>Unit: 5</b>	<b>Data Acquisition System</b> 5.1 Generalized DAS- Block diagram and description of Transducer, signal conditioner, multiplexer, converter and recorder. 5.2 Draw Single Channel and Multi-channel DAS- Block diagram only. Difference between Signal Channel and Multi-Channel DAS. 5.3 Concept of electrical and electronic data transmission- serial, parallel, synchronous, asynchronous. 5.6 Digital display device- operation and its application of seven segment display, dot matrix display and concept of 3½, 4½ digits, LED and LCD applications.	<b>7</b>
<b>Unit: 6</b>	<b>Condition Monitoring and Diagnostic Analysis</b> 6.1 Definition of condition monitoring 6.2 Condition monitoring of: power transformer, electrical motors, alternators and circuit breakers - purpose and key benefits. 6.3 Test for condition monitoring: Insulation resistance, tan delta test and Polarization index, partial discharge test, transformer oil breakdown voltage test. 6.4 Concept of thermal imaging for condition monitoring.	<b>10</b>
	<b>Total</b>	<b>45</b>

**Course outcomes:**

The theory and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- a) Understand electrical transducers for measurement of electrical quantities and to select relevant transducers according to the applications.
- b) Understand non-electrical transducers for measurement of non-electrical quantities and to select relevant transducers according to the applications.
- c) Know about operational amplifier and its use in the field of instrumentation.
- d) Know about signal conditioning system for their proper functioning.
- e) Interpret data acquisition systems in various applications.
- f) Undertake condition monitoring for diagnostic analysis of electrical equipment.

<b>Internal Assessment (40 Marks)</b>		
Mid Semester Class Test:20 Marks	Quizzes, viva-voce, Assignment: 10 Marks	Attendance: 10
<b>External Assessment (End Semester Examination:60 Marks)</b>		
GROUP	UNIT	
A	1,2	
B	3,4	
C	5,6	

Course Code	:	EEPE 304/1
Course Title	:	INDUSTRIAL INSTRUMENTATION AND CONDITION MONITORING LABORATORY
Number of Credits	:	1 (L: 0, T: 0, P: 2)
Prerequisites	:	NIL
Course Category	:	PE

### Course objectives:

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

- Use instrumentation equipment for condition monitoring and control.

### Practicals

<b>List of Practical:(at least EIGHT are to be done)</b>	
1.	Identify float, proximity, limit switches, push button, pressure switch, thermostat, electromagnetic relay used in instrumentation system.
2.	Measure linear displacement by L.V.D.T.
3.	Measure the strain with the help of strain gauge.
4.	Measure temperature by PT-100, thermistor, thermocouple along with simple resistance bridge.
5.	Use Thermocouple to control the temperature of a furnace/machine
6.	Measure angular speed of rotating machine using stroboscope and tachometer.
7.	Measure the flow using flow meter (Electromagnetic/ turbine).
8.	Use op-amp(IC -741) as differentiator.
9.	Use op-amp(IC -741) as integrator.
10.	Use op-amp(IC -741) as instrumentation amplifier.
11.	Break Down Voltage test of transformer oil.
12.	Visit to testing center of electrical testing lab for tan delta and diagnostic tests and determine polarization index.
13.	Prepare a Report on various tools and equipment used for condition monitoring of electrical machines.
14.	Use of infrared camera for thermal imaging of electrical equipment.

### **Course outcomes:**

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- Select relevant instruments used for measuring electrical and non-electrical quantities.
- Select relevant transducers/sensors for various applications.
- Use relevant instruments for measuring non-electrical quantities.
- Check the signal conditioning system for their proper functioning.
- Use data acquisition systems in various applications.
- Undertake condition monitoring for diagnostic analysis of electrical equipment.

Course Code	:	EEPE 302/2
Course Title	:	ELECTRICAL TESTING AND COMMISSIONING
Number of Credits	:	3 (L: 3, T: 0, P: 0)
Prerequisites	:	NIL
Course Category	:	PC

### Course objective

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

- Follow standard safety procedures in testing and commissioning of electrical equipments.

<b>Contents (Theory):</b>		<b>Hrs./Unit</b>
<b>Unit : 1</b>	<p>1.1. Do's and don'ts regarding safety in domestic electrical appliances.</p> <p>1.2. Electrical safety in industry/power stations/ substations at the time of operation/ control/ maintenance.</p> <p>1.3. Procedure for rescuing the person who has received an electric shock, methods of providing artificial respiration (CPR).</p> <p>1.4. Class of fire; Fire detection alarm, fire-fighting equipments. Precautions to be taken to avoid fire due to electrical reasons.</p>	<b>04</b>
<b>Unit : 2</b>	<p><b>Installation and Erection</b></p> <p>2.1 Concept of foundation for installation of machinery. Requirements of foundation for static and rotating electrical machinery.</p> <p>2.2 Concept of leveling and aligning Procedure for leveling and alignment of direct coupled drive, effects of misalignment.</p> <p>2.3 <b>Installation of transformer as per I.S. 10028(part II): 1981 reaffirmed 2021.</b></p> <p>2.3.1 <b>INSTALLATION:</b> Precautions, Site Preparation, Cabling, Bushings and Cable Boxes, Connections, Precautions against Risk of Fire, Safety Precautions.</p> <p>2.3.2. <b>DRYING OF TRANSFORMERS:</b> Precautions When Drying and Methods of Drying.</p> <p>2.3 <b>Requirements of installation of induction motor as per I.S. 900 – 1992:</b></p> <p><b>INSTALLATION WORK:</b> Location of Motors and Control Apparatus; Drying Out; Commissioning of motor.</p>	<b>10</b>
<b>Unit: 3</b>	<p><b>Testing and Commissioning</b></p> <p>3.1 Objectives of testing, Types of tests and concepts: Routine test, type test, supplementary test, special tests. Methods of testing - Direct/Indirect/Regenerative testing.</p> <p>3.2 Factors affecting life of insulating materials. Classifications of insulating materials as per IS:1271-1985 Reaffirmed 2001. Ageing Factors and Thermal Classes</p> <p>3.3 Insulating oil - properties of insulating oil: viscosity, purity, acidity, flash point and fire point; causes of deterioration of oil.</p> <p><b>3.4 Tests before and after Commissioning:</b></p> <p>3.4.1 Testing of transformer oil: a) dielectric strength test; b) acidity test; c) sludge test; d) moisture test, e) flash point test.</p> <p>3.4.2. Testing of transformer: Impedance voltage, load losses, Insulation resistance, induced over voltage withstand test, Impulse voltage withstand test, Temperature</p>	<b>15</b>

	<p>rise test of oil &amp; winding, Different methods of determining temperature rise- back-to-back test, open delta (delta – delta) test.</p> <p>3.4.3 Testing of three-phase induction motor as per I.S.4029 -2010: High voltage test; Temperature-Rise Test; No load and locked rotor test.</p> <p>3.4.4 List of type, routine and acceptance tests of single-phase induction motor as per I.S.996-2009.</p> <p>3.4.5 Testing methods of synchronous machines as per IS 7132-1973: High voltage tests.</p>	
<b>Unit: 4</b>	<p><b>Troubleshooting Plans</b></p> <p>4.1 Internal and external causes for failure / abnormal operation of equipment.</p> <p>4.2 List of mechanical faults, electrical faults and magnetic faults in the electrical equipment and their remedies.</p> <p>4.3 Preparation of trouble shooting charts for D.C. Machines, AC Machines and transformers, batteries.</p>	<b>08</b>
<b>Unit: 5</b>	<p><b>Maintenance</b></p> <p>5.1 Concept of maintenance, types of maintenance, time based and condition based preventive maintenance, breakdown maintenance.</p> <p>5.2 Preventive maintenance schedules for electrical machines, Factors affecting preventive maintenance schedules</p> <p>5.3 Concept of Total productive maintenance (TPM), Pillars of TPM</p> <p>5.4 Maintenance schedules of the following:</p> <p>i. Power and Distribution transformer.</p> <p>ii. Three phase Induction motors.</p> <p>iii. LV and HV switchgear.</p> <p>iv. Station Batteries.</p>	<b>08</b>
	<b>Total</b>	<b>45</b>

**Course outcomes:**

The theory and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- a) Follow safety procedures with respect to earthing and insulation of electrical equipment
- b) Select proper tools, equipment, for installation, testing, maintenance of electrical machines and transformers
- c) Test and commission electrical equipment in accordance with IS codes
- d) Make plans for troubleshooting electrical machines.
- e) Undertake regular preventive and breakdown maintenance.

<b>Internal Assessment (40 Marks)</b>		
Mid Semester Class Test:20 Marks	Quizzes, viva-voce, Assignment: 10 Marks	Attendance: 10
<b>External Assessment (End Semester Examination:60 Marks)</b>		
GROUP	UNIT

B	3	
C	4,5	

Course Code	:	EEPE304/2
Course Title	:	ELECTRICAL TESTING AND COMMISSIONING LABORATORY
Number of Credits	:	1 (L: 0, T: 0, P: 2)
Prerequisites	:	NIL
Course Category	:	PE

### Course objectives:

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

- Follow standard safety procedures in testing and commissioning of electrical equipment.

### Practicals:

List of Practical:(at least EIGHT are to be done)	
1.	Determine breakdown strength of transformer oil.
2.	Perform insulation resistance test on any one motor/transformer.
3.	Prepare trouble shooting charts for electrical machines such as Transformer, D.C. machines, Induction motor and Synchronous machines.
4.	Measure impedance voltage and load losses of three-phase transformer.
5.	Find regulation and efficiency of single-phase transformer using back-to-back connection method.
6.	Determine efficiency of D.C. motor by direct loading or by electrical loading.
7.	Determine efficiency of D.C. machine by Hopkinson's test.
8.	Perform reduced voltage running up test on three-phase Induction motor as per I.S.325.
9.	Measure no load power, losses, current of a single-phase transformer upto 110% of rated voltage.
10.	Perform no load test on single phase Induction motor for the measurements of no load current, power input, and speed at rated voltage.
11.	Methods of providing artificial respiration (CPR) and prepare a report.
12.	Study of different types of fire extinguisher.

### Course outcomes:

The practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- Select proper tools, equipment, for installation, testing, maintenance of electrical machines and transformers
- Test the performance of insulating oil and transformers
- Test the performance of induction machine.
- Test the performance of dc machines.
- Make plans for troubleshooting electrical machines.

## EXAMINATION SCHEME (SESSIONAL)

- 3. Continuous Internal Assessment of 60 marks** is to be carried out by the teachers throughout the fourth Semester. **Distribution of marks:** Continuous evaluation:50 Marks; Class Attendance: 10 Marks
- 4. External Assessment (end Semester examination) of 40 marks** shall be held at the end of the sixth Semester on the entire syllabus. Assignment on the day of Viva-voce and practical report submission:20; Viva-voce:20.

Course Code	:	EEPE 302/3
Course Title	:	ELECTRIC VEHICLES
Number of Credits	:	3 (L: 3, T: 0, P: 0)
Prerequisites	:	NIL
Course Category	:	PE

**Course objectives:**

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

- i. To know the salient features of Hybrid electric vehicles and its auxiliaries.
- ii. To explain the working of dc to dc, and dc to ac converter applied in Electric vehicles.
- iii. To know the parameters of battery used in EV and its charging system.

<b>Contents (Theory):</b>		<b>Hrs./Unit</b>
<b>Unit : 1</b>	<p><b>Unit – I Introduction to Hybrid Electric Vehicles</b></p> <p>1.1 Evolution of Electric vehicles.</p> <p>1.2 Advanced Electric drive vehicle technology:</p> <p>    1.2.1 Vehicles-Electric vehicles (EV),</p> <p>    1.2.2 Hybrid Electric drive (HEV),</p> <p>    1.2.3 Plug in Electric vehicle (PIEV).</p> <p>1.3 Components used Hybrid Electric Vehicle.</p> <p>1.4 Economic and environmental impacts of Electric hybrid vehicle: i. Parameters affecting Environmental; ii. Comparative study of vehicles for economic, environmental aspects.</p>	<b>10</b>
<b>Unit : 2</b>	<p><b>Dynamics of hybrid and Electric vehicles</b></p> <p>2.1 General description of vehicle movement.</p> <p>2.2 Factors affecting vehicle motion- Vehicle resistance, tyre ground adhesion, rolling resistance, aerodynamic drag, equation of grading resistance, dynamic equation. Drive train configuration, Automobile power train, classification of vehicle power plant , Performance characteristics of IC engine, , need of gear box, electric motor.</p> <p>2.3 Classification of motors used in Electric vehicles</p> <p>2.3.1 Basic architecture of hybrid drive trains, types of HEVs ; Energy saving potential of hybrid drive trains.</p> <p>HEV Configurations-Series, parallel, Series-parallel, complex.</p>	<b>10</b>
<b>Unit: 3</b>	<p><b>DC-DC Converters for EV and HEV Applications</b></p> <p>3.1 EV and HEV configuration based on power converters</p> <p>3.2 Classification of converters –unidirectional and bidirectional</p> <p>3.3 Application of Buck, Boost and Buck- Boost converters in EV using block diagram.</p>	<b>05</b>

<b>Unit: 4</b>	<b>DC-AC Inverter &amp; Motors for EV and HEVs</b> 4.1 Principle, operation and Characteristics of permanent magnet synchronous motors, BLDC and switched reluctance motor. 4.2 Applications of DC-AC Converters in EV.  4.3 Application & control of induction motor, permanent magnet synchronous motors, BLDC and switched reluctance motors used in EVs and HEVs. 4.4 Application of regenerative braking in EV.	<b>10</b>
<b>Unit: 5</b>	<b>Batteries</b> 5.1 Overview of batteries: Battery Parameters, types of batteries 5.2 Battery Charging and Battery Management System. 5.3 Alternative novel energy sources-solar photovoltaic cells, fuel cells, super capacitors, flywheels. 5.4. Control system for EVs and HEVs, overview, Electronic control unit ECU Schematics of hybrid drive train, control architecture.	<b>10</b>
	<b>Total</b>	<b>45</b>

**Course outcomes:**

The theory and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- a) Interpret the salient features of Hybrid electric vehicles.
- b) Interpret the Dynamics of hybrid and Electric vehicles
- c) Analyse the DC-DC converters used in EV applications.
- d) Analyse and apply the DC-AC converters in EV applications.
- e) Select the batteries for EV applications.

Course Code	:	EEPE304/3
Course Title	:	ELECTRIC VEHICLES LABORATORY
Number of Credits	:	1 (L: 0, T: 0, P: 2)
Prerequisites (Course code)	:	NIL
Course Category	:	PE

**Course objectives:**

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

Maintain electric vehicles

**Practicals:**

<b>List of Practicals: (At least EIGHT are to be performed)</b>	
1.	Develop block diagram of Electric vehicle and identify parts.
2.	State of Charge (SOC) estimation by open circuit voltage.
3.	Develop schematic diagram of hybrid electric vehicle and identify the components.
4.	Prepare report on Plug in Electric vehicle by visiting a charging station.
5.	Experiment on inverter connected with lead acid/ lithium-ion battery.
6.	Experiment on Buck Boost converters.
7.	Experiment on bidirectional converter.
8.	Lithium-ion battery modelling and fault detection design.
9.	Prepare test procedure for equipment used in Electric vehicle.
10.	List safety procedures and schedule for handling HEVs and EVs.
11.	Assembly of EV charging point and study of charging modes.

**Course outcomes:**

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- a) Interpret the salient features of Hybrid electric vehicles.
- b) Interpret the Dynamics of hybrid and Electric vehicles
- c) Maintain the DC-DC converters in EV applications.
- d) Maintain the DC-AC converters in EV applications
- e) Select the batteries for EV applications.

Course Code	:	PR302
Course Title	:	Major Project
Number of Credits	:	2 (L: 0, T: 0, P: 4)
Prerequisites	:	Knowledge of subjects up to 5 <sup>th</sup> Semester of Electrical Engineering.
Course Category	:	PR

### **Course Objective:**

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

- Design and development of small electrical and electronics device/equipment.

### **Project group:**

1. Formation of project group: Maximum **6 students per batch**.
2. Each project group should select work by consulting the guide.

### **Activity (Atleast one):**

- i. Speed control of stepper motor/ dc motor using microcontroller.
- ii. Robotic car using microcontroller.
- iii. Over voltage/ over current protection using microcontroller/ static system.
- iv. Battery management system using microcontroller.
- v. Home automation using microcontroller.
- vi. Any topic relevant to Diploma in Electrical Engineering course as suggested by the Department/supervisor(s).

### **References:**

1. A K Sawhney; A course in Electrical Machine Design; Dhanpat Rai & Co.
2. Raina Bhattacharya; Electrical Design, Estimating and Costing; New Age International Publishers
3. V. Rajini and V.S. Nagarajan; Electrical Machine Design; Pearson
4. Bhattacharya Chatterji; Projects in Electrical, Electronics, Instrumentation and computer Engineering.

### **Course outcome:**

- i. Develop proper planning to achieve the project goal.
- ii. Collect relevant information and resources.
- iii. Identify and apply proper techniques.
- iv. Analyse the performance of project output.
- v. Organize the Written documentation of the project work

## **EXAMINATIONS SCHEME (SESSIONAL)**

**1. Continuous Internal Assessment of 60 marks** is to be carried out by the teachers throughout the fourth Semester. **Distribution of marks:** Continuous evaluation: 30 Marks; Project report:20 Class Attendance: 10 Marks

**2. External Assessment (end Semester examination) of 40 marks** shall be held at the end of the sixth Semester on the entire syllabus. Project and project report:20; Viva-voce:20

Course Code	:	SE302
Course Title	:	Seminar
Number of Credits	:	2 (L: 0, T: 0, P: 4)
Prerequisites	:	Knowledge of subjects up to 5 <sup>th</sup> Semester of Electrical Engineering.
Course Category	:	SE

The course 'Seminar' is intended to enable a student to read, understand, prepare and present report about an academic document. The learner shall search in the literature including various journals, books, project reports, online resources etc., and identify an appropriate paper /report in her/his area of interest, in consultation with her/his seminar guide. This course can help the learner to experience how a presentation can be made about a selected academic document and also empower her/him to prepare a technical report.

Course Objectives:

- To do literature survey in a selected area of study.
- To understand an academic document from the literature and to give a presentation about it.
- To prepare a technical report.

General Guidelines: It's advisable to choose topics for the Seminar to be closely linked with following topics.

Seminar1: Based on any theoretical paper/ laboratory/ previous semester project or any other topics as instructed by concerned teacher.

Seminar2 : Based on final semester project . (group/ individual student)

(Every student has to submit report and presentation on Seminar1 and Seminar2.)

The Electrical Engineering Department shall form an Internal Evaluation Committee for the seminar. During the seminar presentation of a student, all members of committee shall be present. Formation of group of students and corresponding guide allotment shall be completed as earlier after completion of 5<sup>th</sup> semester examination.

Course Outcomes: After successful completion of the course, the students will be able to:

- Identify academic documents from the literature which are related to her/his areas of interest.
- Read and apprehend an academic document from the literature which is related to her/ his areas of interest.
- Prepare a presentation about an academic document.
- Give a presentation about an academic document.
- Prepare a technical report.

## E X A M I N A T I O N S C H E M E (SESSIONAL)

**1. Continuous Internal Assessment of 60 marks** is to be carried out by the teachers throughout the fourth Semester. **Distribution of marks:** Continuous evaluation: 30 Marks; Presentation report:20  
Class Attendance: 10 Marks

**2. External Assessment (end Semester examination) of 40 marks** shall be held at the end of the sixth Semester: Presentation:20; Viva-voce:20

<b>Course Title</b>	<b>Entrepreneurship and Start-ups</b>
Course Code	HS 302
Number of Credits	3
Pre-Requisites	None
Total Contact Hours	3(L: 2; T: 1)/week = 45 hrs
Course Category	HS

### Course Learning Objectives

1. To raise awareness, knowledge and understanding of enterprise/ entrepreneurship.
2. To motivate and inspire students toward an entrepreneurial career.
3. To understand venture creation process and to develop generic entrepreneurial competences.
4. To introduce students to the basic steps required for planning, starting and running a business.
5. To familiarise students with the different exit strategies available to entrepreneurs.

### Course Outcomes:

After completing the course students will able to:

CO 1	Identify qualities of entrepreneurs, develop awareness about entrepreneurial skill and mindset and express knowledge about the suitable forms of ownership for small business
CO 2	Comprehend the basics of Business idea, Business plan, Feasibility Study report, Project Report and Project Proposal
CO 3	Understand the concept of start-up business and recognise its challenges within legal framework and compliance issues related to business.
CO 4	Make a Growth Plan and pitch it to all stakeholders and compare the various sources of funds available for start-up businesses

### Detailed Course Content

Unit	Name of the Topic	Hours
1.	<p><b>ENTREPRENEURSHIP – INTRODUCTION AND PROCESS</b></p> <ul style="list-style-type: none"> <li>• Concept, Competencies, Functions and Risks of entrepreneurship</li> <li>• Entrepreneurial Values&amp; Attitudes and Skills</li> <li>• Mindset of an employee/manager and an entrepreneur</li> <li>• Types of Ownership for Small Businesses <ul style="list-style-type: none"> <li>○ Sole proprietorship</li> <li>○ Partnerships</li> <li>○ Joint Stock company- public limited and private limited companies</li> </ul> </li> <li>• Difference between entrepreneur and Intrapreneur</li> </ul>	10
2.	<p><b>PREPARATION FOR ENTREPRENEURIAL VENTURES</b></p> <ul style="list-style-type: none"> <li>• Business Idea- Concept, Characteristics of a Promising Business Idea, Uniqueness of the product or service and its competitive advantage over peers.</li> </ul>	20

	<ul style="list-style-type: none"> <li>• Feasibility Study – Concept – Locational, Economic, Technical and Environmental Feasibility. Structure and Contents of a standard Feasibility Study Report</li> <li>• Business Plan – Concept, rationale for developing a Business Plan, Structure and Contents of a typical Business Plan</li> <li>• Project Report- Concept, its features and components</li> <li>• Basic components of Financial Statements- Revenue, Expenses (Revenue &amp; capital exp), Gross Profit, Net Profit, Asset, Liability, Cash Flow, working capital, Inventory. Funding Methods-Equity or Debt.</li> </ul> <p>Students are just expected to know about the features and key inclusions under, Business Plan and Project Report. <u>They <b>may not</b> be asked to prepare a Business Plan/ Project Report/ Project Feasibility Report in the End of Semester Examination.</u></p>	
3.	<p><b>ESTABLISHING SMALL ENTERPRISES</b></p> <ul style="list-style-type: none"> <li>• Legal Requirements and Compliances needed for establishing a New Unit- <ul style="list-style-type: none"> <li>○ NOC from Local body</li> <li>○ Registration of business in DIC</li> <li>○ Statutory license or clearance</li> <li>○ Tax compliances</li> </ul> </li> </ul>	03
4.	<p><b>START-UP VENTURES</b></p> <ul style="list-style-type: none"> <li>• Concept &amp; Features</li> <li>• Mobilisation of resources by start-ups: Financial, Human, Intellectual and Physical</li> <li>• Problems and challenges faced by start-ups.</li> <li>• Start-up Ventures in India – Contemporary Success Stories and Case Studies to be discussed in the class.</li> </ul> <p>Case studies have been included in the syllabus to motivate and inspire students toward an entrepreneurial career from the success stories. <u>No questions are to be set from the case studies.</u></p>	04
5.	<p><b>FINANCING START-UP VENTURES IN INDIA</b></p> <ul style="list-style-type: none"> <li>• Communication of Ideas to potential investors – Investor Pitch</li> <li>• Equity Funding, Debt funding – by Angel Investors, Venture Capital Funds, Bank loans to start-ups</li> <li>• Govt Initiatives including incubation centre to boost start-up ventures</li> <li>• MSME Registration for Start-ups –its benefits</li> </ul>	06
6.	<p><b>EXIT STRATEGIES FOR ENTREPRENEURS</b></p> <ul style="list-style-type: none"> <li>• Merger and acquisition exit, Initial Public Offering (IPO), Liquidation, Bankruptcy – <b><u>Basic Concept only</u></b></li> </ul>	02

## Examination Scheme

### ❖ End Semester Examination: 60 marks

Suggested Question Paper Scheme for End Semester Examination

#### Group A: 20marks

Question Type	Number of questions to be set	Number of questions to be answered
MCQ, Fill in the blanks, True or False ( Carrying 1 mark each)	25	20

#### Group B: 40marks

Question Type	Number of questions to be set	Number of questions to be answered
Subjective Type questions (Carrying 8 marks each)	10	5

### ❖ Internal Assessment: 40 marks

- Class test : 20 marks
- Assignment: 10 marks
- Class attendance: 10 marks

## Suggested Learning Resources

Sl. No.	Title of Book	Author	Publication
1.	Entrepreneurship Development	Sangeeta Sharma	Prentice Hall of India Learning Private Ltd
2.	Entrepreneurship Development	S. Anil Kumar	New Age International
3.	Fundamentals of Entrepreneurship	Sangram Keshari Mohanty	Prentice Hall of India Learning Private Ltd
4.	Fundamentals of Entrepreneurship	Dr. G.K. Varshney	Sahitya Bhawan Publication
5.	Managing New Ventures: Concepts and Cases on Entrepreneurship	Anjan Raichaudhuri	Prentice Hall of India Learning Private Ltd
6.	How to Start a Business in India	Simon Daniel	Buooks, Chennai
7.	Entrepreneurship and Small Business Management	S.S. Khanka	S. Chand & Sons, New Delhi
8.	Entrepreneurship Development	Abhik Kumar	Oxford University

	and Business Ethics	Mukherjee & Shaunak Roy	Press
9.	Entrepreneurship Development and Business Ethics	Dr B Chandra & Dr B Biswas	Tee Dee Publications
10.	Entrepreneurship Development Small Business Entrepreneurship	Poornima Charantimath	Pearson Education India

## **Engineering Economics & Project Management**

Course Code:	OE302
Course Title:	Engineering Economics & Project Management
No. of Credits:	3 (L:3, T:0,P: 0)
Prerequisites:	NIL
Course Category:	Open Elective (Compulsory for all branches)

### **Course Objectives:**

- To acquire knowledge of basic economics to facilitate the process of economic decision making.
- To acquire knowledge on basic financial management aspects.
- To develop the idea of project plan, from defining and confirming the project goals and objectives, identifying tasks and how goals will be achieved.
- To develop an understanding of key project management skills and strategies.

### **Group-A**

#### **Unit-I (INTRODUCTION, THEORY OF DEMAND & SUPPLY) [9 hours]**

1.1 Introduction to Engineering Economics, the relationship between Engineering and Economics

1.2 Resources, scarcity of resources, and efficient utilization of resources.

1.3 Opportunity cost, rationality costs, and benefits

1.4 Theory of Demand: the law of demand, different types of demand, determinants of demand, demand function, price elasticity of demand.

1.5 Theory of Supply: determinants of supply, supply function.

1.6 Market mechanism: Equilibrium, basic comparative static analysis (Numerical problems)

## **Unit-II (THEORY OF PRODUCTION & COSTS) [10 hours]**

- 2.1 Concept of production (goods & services), Different factors of production (fixed and variable factors), Short-run Production function (Graphical illustration), and Long run production function (returns to scale).
- 2.2 Theory of Cost: Short-run and long-run cost curves with graphical illustration, basic concept on total cost, fixed cost, variable cost, marginal cost, average cost etc.
- 2.3 Economic concept of profit, profit maximization (numerical problems)

## **UNIT-III (DIFFERENT TYPES OF MARKET AND ROLE OF GOVERNMENT) [4 hours]**

- 3.1 Perfect Competition: Features of Perfectly Competitive Market.
- 3.2 Imperfect Competition: Monopoly, Monopolistic Competition, and Oligopoly.
- 3.3 Role of government in Socialist, Capitalist and Mixed Economy structure with example.

## **Group-B**

### **Unit-I (CONCEPT OF PROJECT) [4 hours]**

- 1.1 Definition and classification of projects)
- 1.2 Importance of Project Management.
- 1.3 Project life Cycle [Conceptualization→Planning→Execution→Termination]

### **Unit-II (FEASIBILITY ANALYSIS OF A PROJECT) [10 hours]**

- 2.1 Economic and Market analysis.
- 2.2 Financial analysis: Basic techniques in capital budgeting– Payback period method, Net Present Value method, Internal Rate of Return method.
- 2.3 Environmental Impact study–adverse impact of the project on the environment.
- 2.4 Project risk and uncertainty: Technical, economical, socio-political, and environmental risks.
- 2.5 Evaluation of the financial health of a project–Understanding the basic concept of Fixed & Working Capital, Debt & Equity, Shares, Debentures etc., and different financial ratios like Liquidity Ratios, Activity Ratios, Debt-equity ratio & Profitability Ratio (Basic concept only).

N.B: Knowledge of financial statements is not required; for the estimation of ratios the values of the relevant variables will be provided.

**Unit-III (PROJECT ADMINISTRATION) [8 hours]**

3.1 Gantt Chart– a system of bar charts for scheduling and reporting the progress of a project (basic concept).

3.2 Concept of Project Evaluation and Review Technique (PERT) and Critical Path method (CPM): basic concept and application with real-life examples.

**Examination Scheme:**

A. Semester Examination pattern of 60 marks:

1. Objective type Question (MCQ, Fill in the blanks, and Very Short question-1 mark each): At least five questions from each unit. [Total marks: 20]

2. Subjective questions: Eight questions to be answered taking at least three from each group. (Two questions should be given from each unit). [Total marks: 40]

B. Assignment (10Marks)

Guide line for Assignment (10 Marks)

Students should be instructed to prepare a report on a project (preferably the Major Project they prepare in 6th Semester), using a popular project management software in IT/ Computer Laboratory, under the guidance of the Lecturer in Computer Science & Technology and Lecturer in Humanities.

C. Class Test: Two examinations 20 marks each. Take best of two.

D. Attendance: 10 Marks
